

The Power of Telingua T-Cloud at Your Fingertips.

Tel-Lingua Tel-Cloud Services pricing is transaction based requiring no capital outlays, and are equally applicable to new market entrants and market leaders alike looking for added capacity, improved management systems and routing, termination cost reductions or unique customized solutions to address specialized target markets in order to fundamentally differentiate and enjoy a sustainable competitive advantage.

Cloud Services

Fusing together technologies from TeleDynamicX and Mangold Technologies, leveraging cloud compute power from VMware and DELL and residing in Redplaid and Equinix enterprise class data centers, Tel-Lingua Tel-Cloud services include all necessary compute platforms, operating systems, data bases, session border controllers, media gateways, service control points and software applications to deliver the following collective or individually selected services:

- ♦ US Domestic and International Traffic Management and Business Intelligence Suite , including:
 - ♦ Sell Rate, Buy Rate and Dial Code Administration;
 - ♦ International Least Cost Routing / Quality of Service / Vendor Codes based Routing;
 - ♦ US Domestic LERG synchronization, Inter and Intra State 7 digit (NPA NXX X) Least Cost Routing;
 - ♦ Inter Carrier Billing and Accounting;
 - ♦ Traffic, Revenues, Costs and Margin Reports, Dashboards and Activity Monitors.
- ♦ Customizable network-wide US Domestic and International centralized routing to all TDM and VoIP switches including US Domestic 10 Digit Local Call Routing if required. This user managed platform consolidates routing for diverse switches, overcomes routing limitations within existing switches, provides a platform for the efficient implementation of new, network wide, facilities and future proofs the switching network.
- ♦ Local Number Portability, US and Canadian LNP databases can be queried at a trunk group level, switch level or carrier level providing automatic dipping of non pre-dipped dialed numbers to obtain Local Routing Numbers.
- ♦ Jurisdictional Determination, ANI – Dialed (or ported number) mapping for INTRA / INTER Sate Routing and Rating. ANI mapping to customer supplied Local Call databases for Local call Routing and Rating.
- ♦ ANI Translations for call center or prepaid calling card trunk groups. The ANI can be repopulated dynamically based on outbound telemarketing campaign or dialed number requirements. Selected OCN based CNAM databases or customer CNAM databases can be queried at a trunk group level, switch level or carrier level to present the display name used for advanced Caller-ID.
- ♦ Session Border Controllers and Media Gateways.

Cloud Business Process Management

Whether your Telecoms business is International, US Domestic or both, Tel-Lingua Tel-Cloud Services provides all the required functionality for the efficient management of Buy/Sell Code and Rate Administration, International Least Cost / Best Quality Routing, US Domestic LERG synchronization, Inter and Intra State 7 digit (NPA NXX X) Least Cost Routing, Traffic Monitoring, Profitability Visualization, Post Paid Inter-Carrier Billing and Invoicing.

International

Provides effective management of International Dial Codes, Buy Rates, Sell Rates, Least Cost / Best Quality Routing, Traffic flows and profitability.

Essential Features

- Dial Code Management
- Multi-Currency
- Multi-Billing Increment
- Buy Rate Import Wizard
- Codes Mismatch Report
- Buy Rate Opportunity Watch
- Auto-Generated Sell Rates
- Auto- Sell Rate Notifications
- Sell Rate Margin Watch
- Vendor QOS Monitoring
- True Least Cost Routing
- Multiple Routing Schemes
- QoS Routing
- Vendor Code Routing
- Traffic Monitoring
- Profitability Monitoring
- Billing & Invoicing

Reporting

Business Intelligence Layer with Advanced Data Visualization Tools, including:

- Drillable Dashboards
- Geographic Data Views
- Customizable Charts
- Extensive Reporting
- Activity Monitors with Alarms
- Customer / Vendor Access
 - Traffic Statistics
 - CDR's and Billing Data
- Email and Export Data
- User Profiles

Training and Support

Tel-Lingua Tel-Cloud deploys the very latest technology in Screen and Voice conferencing to provide effective on-Line Live interactive training and support to our customers.

US Domestic

Provides effective management of US Domestic Dial Codes, Buy Rates, Sell Rates, Least Cost Routing to NPA NXX X, Traffic flows and profitability.

Essential Features

- LERG Dial Code Import
- Services Dial Code Blocking
- Buy Rate Import Wizard
- LATAOCN, NPANXX, NPANXX X
- Buy Rate Opportunity Watch
- Sell Rate Watch
- Auto-Generated Sell Rates
 - LATAOCN, NPANXX,
 - NPANXX X, Default Rate
- Target Market Pricing
- Auto- Sell Rate Notifications
- Vendor QOS Monitoring
- True Least Cost Routing
- Multiple Routing Schemes
- Routing to NPANXX X
- Traffic Monitoring
- Profitability Monitoring
- Billing & Invoicing

Cloud Resources and Interconnectivity

Tel-Lingua tel-Cloud Services are housed in world class data center facilities and built on enterprise-class cloud compute technology offering extreme reliability, security and flexibility to meet the smallest to the most demanding of requirements at highly attractive price points.

With geographic diversity, high availability or full redundancy if required, and signaling options via SIP or SIGTRAN(SS7) to a dynamic ecosystem of business partners including Internet service providers, content and global telecom providers, VoIP Carriers, Wholesalers, Wireless Operators, CLEC's and ILEC's through fast, low latency bandwidth, Tel-Lingua tel-Cloud Services provide a complete platform for business initiation and growth .
